IHR CHRONICLES

Welcome to the Inaugural Edition of IHR's E-Newsletter, IHR Chronicles

Dear All,

We are thrilled to introduce you to the debut edition of our e-newsletter! This platform marks an exciting milestone in our ongoing commitment to keep you informed, engaged, and empowered on matters of health and wellness, events and updates at IHR.

At IHR, we recognize the importance of staying connected and providing valuable resources to support your journey towards optimal health. Through this e-newsletter, we aim to bridge the gap between our healthcare professionals and the wonderful individuals we serve.

In these e-newsletters, you'll discover a wealth of information, including upcoming events, past events, educational opportunities, latest updates and learn about the innovative initiatives we're spearheading to enhance patient care and community outreach.

As we embark on this journey together, your feedback is instrumental in shaping the future direction of our e-newsletter. We encourage you to share your thoughts, suggestions, and topics of interest that you'd like to see covered in upcoming editions. Your input fuels our commitment to delivering content that resonates with you and addresses your evolving needs.

Together, let's cultivate a culture of health and wellness that enriches lives and strengthens our community. Thank you for entrusting us with your healthcare journey. We are honored to serve you and look forward to the exciting opportunities that lie ahead.

Warm regards,
Dr. Deepak Goenka
Editor

IHR CHRONICLES

HIGHLIGHTS OF THE MONTH

New suction pump for OPU

The K-MAR-5200 vacuum pump stands out as the best in industry, featuring cutting-edge technology, delivering superior performance in industrial applications. With its robust design, it ensures reliability and efficiency, ideal for ovum pick up processes. Featuring advanced control options, it offers precise management and monitoring capabilities. Its compact footprint and quiet operation make it a standout choice for demanding environments.

MoU with Marwari hospital for blood bank

IHR and Marwari Hospitals signed an MoU for a blood bank collaboration. Goals include ensuring a steady blood supply, adhering to quality standards, and upholding confidentiality. The MoU outlines responsibilities, communication channels and legal aspects for the partnership's success.

HIGHLIGHTS OF THE MONTH

Past Event

Dr. Ranjit Agarwal is delivering a talk titled "Red Flags for Autism" on the IAP (Indian Academy of Pediatrics) platform. This session likely aims to raise awareness about early signs of autism spectrum disorder (ASD) among healthcare professionals and parents for early intervention and support.

Upcoming Event

Mrs. Ritu Gupta, Counselor, IHR, is organising a retreat program "The Blissful Soul". It is about delving into the beauty of life's simplicity, recognizing that every step ignites profound change. Embracing creativity as the essence of existence, magnifying life's experiences. Join for an enriching exploration of self-discovery, where each moment blossoms into an extraordinary adventure of the soul.

UNDERSTANDING TORTICOLLIS: CAUSES, SYMPTOMS, AND MANAGEMENT

TORTICOLLIS

Dr. Ranjit Agarwala
PAEDIATRICS SPECIALIST

Understanding Torticollis: Causes, Symptoms, And Management By Dr. Ranjit K Agarwala – IHR India

Torticollis, is a condition characterized by the involuntary contraction or shortening of neck muscles, resulting in the tilting or turning of the head to one side. While it can occur at any age, torticollis is most commonly diagnosed in infants (congenital torticollis) and adults (acquired torticollis).
